# Charter Timetables SUMMER 2007

1<sup>st</sup> May 2007 – 31<sup>st</sup> October 2007

## BIRMINGHAM

[www.flymonarchvirtual.co.uk](http://www.flymonarchvirtual.co.uk)

## Introduction

Welcome to the flymonarchvirtual summer timetables for our charter flights. These timetables provide an accurate set of flights for you to fly and log this summer season. These are to be used in conjunction with our summer-scheduled timetables. We hope you enjoy using them and have many happy flying hours on our short and long haul charter flights!

flymonarchvirtual team

## Notes

These timetables have been based upon various data sources in the summer season, and are valid from 1<sup>st</sup> May 2007 – 31<sup>st</sup> October 2007.

It goes without saying that charter flight schedules are very loose and difficult to accurately represent. Many hours of research have gone into these and they provide a highly realistic flying schedule this summer. Please enjoy, even if there are some differences to the flights you'll see on the airport departure boards, these are compiled in advance.

Look out for extra flights that are added on the timetables page separately for more flights!

## Codes

### Aircraft

A320	Monarch Airbus A320
A321	Monarch Airbus A321
B752	Monarch Boeing 757-200
B767	Monarch Boeing 767-300
A300	Monarch Airlines Airbus A300-600R
A330	Monarch Airlines Airbus A330-200

The flights should be flown in FS with the times as per the timetable, where possible. Flight times are approximations and factor in ATC problems, winds etc. A reminder: flights must be flown in real time!

Flights don't have to be operated inside the operating period, as this might restrict choice.
